Artscreen Specification

Artscreen Polystyrene

Artscreen polystyrene has sparkling clarity, is light weight and has good resistance to breakage. It is very versatile and a chosen choice by many picture framers as it can be easily cut to size allowing a wide range of finished frames to be produced from a standard stock sheet. It also has good optical properties and a brilliant surface, low density and a good chemical resistance and high rigidity.

- Excellent transparency
- Good surface hardness
- Good recyclability
- Low water absorption
- UV stabilised

999 000 034 – Clear 1.2mm

999 000 035 – Non Glare 1.2mm

999 000 134 – Clear 2mm

Artscreen Plus Acrylic

Artscreen plus acrylic has sparkling clarity and provides long lasting UV resistance. It has good optical properties and a brilliant surface. It offers excellent transparency and good mechanical properties. These sheets have very good weathering and ageing resistance and remain constant colour contrast for years.

- Good optical properties
- Transparently clear
- Remain colour constant
- UV Resistant
- Do not contain any toxic materials
- Recyclable

999 200 034 – Clear 2mm

999 200 134 – Clear 2mm
