

# FRAMING BY DESIGN

---

Beautifully framed artwork can make an important contribution to a room, whether making a bold statement about a whole space or simply enhancing an overall scheme.

Larson-Juhl UK is Britain's leading supplier of picture frames and mouldings, offering the most comprehensive range of framing products in the market. With an unparalleled choice of over 3,000 beautiful mouldings, more than 100 readymade frames, over 200 mountboard colours, plus a vast selection of accessories, glazing products, conservation framing and storage items.

Larson-Juhl UK mouldings range from the simple to elaborate, classic to contemporary, wood, metal, natural materials, modern finishes, with a rainbow of colours. New products are launched every couple of months and we are always looking to pick up on current trends as well as lead the way when it comes to innovation in framing.

As part of the global Larson-Juhl brand, the UK team can access worldwide group resources, the best in new product development and great customer service, which includes the provision of visuals or samples for mood boards and a next day delivery service along with competitive rates.

Larson-Juhl UK offers global expertise - delivered locally.

#### ANVIL BY LARSON-JUHL SIGNATURE

Anvil offers a forged look, or the look of reclaimed metal. Much care has been taken to also offer small hints of reflective light on the high spots to enhance the look of real metal. Designed to pair with raw woods, the metal accents offer a hint of light and texture to simple wood collections. The Oiled Steel finish has been toned to work well with black and white photography and offer a new option to those who prefer not to use black.

#### LUNA BY LARSON-JUHL SIGNATURE

Made from lustrous layers of wood, the Luna collection has a delicate foil finish inspired by the lunar landscape. Its undulating surface plays with natural light to create a modern, luminescent collection. Luna's three finishes in silver, gold and bronze feature rich melted tones with a wood furniture accent – reminiscent of the golden age of space exploration.

#### EIFFEL BY LARSON-JUHL SIGNATURE

Taking inspiration from the iconic Parisian landmark, the Eiffel collection has a metallic finish that mimics the wrought iron material used to construct the tower, while the profile's texture is reminiscent of its lattice pattern. Eiffel is available in four shimmering shades: silver, pewter, gold and bronze.

#### ANGUS BY LARSON-JUHL SIGNATURE

Raw materials from Tuscany have been sourced to make the Italian-inspired Angus moulding range. The faux leather look and feel give a stunning appearance. Available in Dutch black, with subtle burgundy highlights, antique brown, giving an aged feel, and Cognac with its hand finished and tanned look. These exciting profiles offer an array of possibilities for artefacts, fine art canvases and photography. The materials have been stained and embossed to enhance their appearance and all three finishes reflect the light to show off a beautiful wax finish.

### TOUCHSTONE BY LARSON-JUHL COLLECTIONS

The Touchstone collection takes its inspiration from the trend for concrete furnishings, delivering a subtle urban style to whatever artwork it surrounds. With its modern look and feel, the three elements that make this range particularly special are its grey colour selections, texture and distinctive dappled effect.

### TOUCHOXIDE BY LARSON-JUHL COLLECTIONS

With modern trends moving into more perfectly imperfect décor, and an appetite for urban style, the rustic colour of this collection works with all types of artwork. It is produced through an intricate three-layer lamination process – firstly the rich colour, next a beautiful dappled effect and the third is the glorious textures. Together, these create the look of rustic metal in a bold and confident colour.

### TOUCHWOOD BY LARSON-JUHL COLLECTIONS

Our Touchwood collection provides a selection of products with a natural veneered finish in wenge, walnut, oak, maple and beech. The collection is split into four ranges:

- Art – comprised of simple, everyday mouldings
- Interiors – cutting edge profiles designed to appeal to interior designers
- Floats/Spacers – float mouldings and spacers for canvases
- Unique – an unusual and original mix of veneers and finishes.

The collection gives the opportunity to capture the fashionable 'unfinished' or Nordic look but with none of the challenges associated with working in solid wood mouldings.

## CLARITY

Clarity by Larson-Juhl is a specifically manufactured glass for use in picture frames. The anti-reflective properties of Clarity reduce unwanted reflections – clearly showcasing all colours without any distortions. Clarity is an immediate contender for use in displays requiring museum quality or art glass, where items or exhibits are required to be shown in optimum conditions. Available in three sizes; 800 x 1100 mm, 915 x 1220 mm and 1100 x 1600 mm, also available with 99% UV filtering visit [www.larsonjuhl.co.uk](http://www.larsonjuhl.co.uk) for further details.

## MOUNTBOARD

Larson-Juhl has a huge selection of mountboards in a variety of styles and colours, including its linen and suedette collection. The material based boards are available in a selection of seven linen-look colours along with ten suedette colours including – blue (Bermuda) and brown (mink) – giving a unique textured finish to artwork.
