TOUCHWOOD

INTRODUCING THE UNIQUE **TOUCHWOOD** RANGE EXCLUSIVELY BY LARSON-JUHL

The **Touchwood** range is unique. Solid wood mouldings such as oak and beech are hard to cut and very heavy. Having a real wood veneer makes them lighter, easier to cut and affordable.

The range gives the opportunity to capture the fashionable 'unfinished' or Nordic look but with none of the challenges associated with working in solid wood mouldings. With a unique set of profiles, Touchwood retains the sharp edge necessary for the perfect framing of art. Touchwood also allows a framer to add their own choice of stain finish.

All our Touchwood ranges are available in five real wood finishes

Cover image Artwork by John Waterhouse. Published by Washington Green. Mouldings 991079114/991174117. Mount 8065 Hayseed.
